

**Course Dates:**

- July 2021
- September 2021
- October 2021
- November 2021

# Healthcare Lighting Best Practices: Lighting the Modern Hospital

**8 Continuing Education Credits:**

*IESNA (CEU) or AIA/CES, HSU, (LU),  
or NCQLP (LEU).*

Learn about current trends in Healthcare and how your lighting design for critical spaces can optimize patient outcomes.

Each session is limited in size, facilitating dynamic exchange of ideas for superior lighting design throughout all areas of the global healthcare delivery system.

Case studies provide hands on applications of concepts and current IES and WELL Building standards. MRI, ICU / NICU and birthing suite installations provide practical lighting layout examples.

**Topics Include:**

- Trends in Healthcare: Optimizing Patient Outcomes, Infection Control, Tunable White
- Behavioral Health Lighting Requirements
- ICU / NICU / PICU, Cardiac Cath
- Operating Rooms / Hybrid OR
- Labor, Delivery, Recovery & Postpartum
- MRI Lighting: Ensuring Accurate Scans
- Circadian Lighting Systems: To “Tune or Not to Tune”
- Patient Room Lighting and Controls
- Studies on Lighting and Its Effects on Patient Health
- RP-29 Review and Practices (IES)
- WELL Building Standard
