INFRALED® PRO

Labor & Delivery

Neonatal ICU

ICU & Patient Room

Cardiac Cath Lab

Hybrid OR

Emergency

Clinical Benefits

60°
illumination

The industry's highest angle of light delivers illumination 64% further into the birth canal, compared to competing products.

63,000
lux on task

More light on task ensures better outcomes. One pair of INFRALED® PRO 60 luminaires deliver up to 63,000 lux on task.

95+
CRI (extended)

In neonatal environments, accurate color rendering is crucial. INFRALED® PRO's LED light engine boosts reds and blues with a Cyanosis Observation Index of 2.7.

Operational Benefits

Cool operating temperatures

50,000 hour system life

60-80% energy savings (over non-LED sources)

Instant Aiming with "One Touch" Controls

An easy-to-use remote control and wall panel enable the clinician to independently vary the direction and intensity of up to 4 INFRALED® PRO exam lights with one touch, illuminating the patient effectively in any location.

INFRALED® PRO

Recessed motorized patient lighting system for critical care environments.

PRO 60

High-angle exam light with 60° tilt for Child-birth & Surgery

PRO 45

19" exam light with 45° tilt for OR, Hybrid OR & Cath Lab
