

INFRALED®

1 LIGHT SYSTEM - 360°

MRR-12622

LED Remote Controlled
Motorized
Recessed Patient
Lighting System

- ICU • CCU • ED
- NICU/PICU
- PATIENT ROOM
- CATH LAB

Performance: Cool LED beam with excellent color rendering of red tissue and skin tones: 95+ CRI (with high R9, R13 and R15). Up to 5700 footcandles delivered from the one light system.

Function: Precise adjustability of direction and brightness.

Design: Inconspicuous, fully recessed luminaire. Smooth white BioGard™ anti-microbial finish. Redundant controls.

Use: Fast, single-hand adjustability using either infrared remote or wall control. Maintenance free 60,000 hour life LEDs.

MRR-12622 **INFRALED®** 1 LIGHT SYSTEM - 360°

LED INFRARED REMOTE CONTROLLED ADJUSTABLE LIGHTING SYSTEM

Features

This lighting system features **one** fully recessed **luminaire** plus a **wall control** and a **remote control**:

Luminaire Offers:

- Up to 3000 delivered lumens
-  Exclusive OPTeCOLOR™ LEDs with 95+ CRI, high R9 value of 85, cool beam and 60,000 hour life (L70); standard 3500°K, optional 5000°K
- Rotates 360° and tilts up to 35° either side of nadir; optional 15° bottom pan allows lighthouse to tilt up to 50° in one direction
- 0-10V CCR 100-10% dimming
- BioGard™ anti-microbial white regressed smooth flare architectural trim with tempered clear flat glass lens
- IP65 optional 
- Lightweight construction for easy installation in any ceiling (27 pounds)
- Completely serviceable through the aperture; convenient plug-in components for easy installation and service

- Meets IEC/EN 60601-1-2 electromagnetic compatibility standard for medical electrical equipment. FCC Part 15 certified for EMI/RFI emissions

Wall Control / Remote Offers:

- Full control of light from both wall control and remote control
- Tactile membrane controls for power, intensity (100-10%) and direction
- Smooth surfaces for easy cleaning with isopropyl alcohol

Wall Control Also Features:

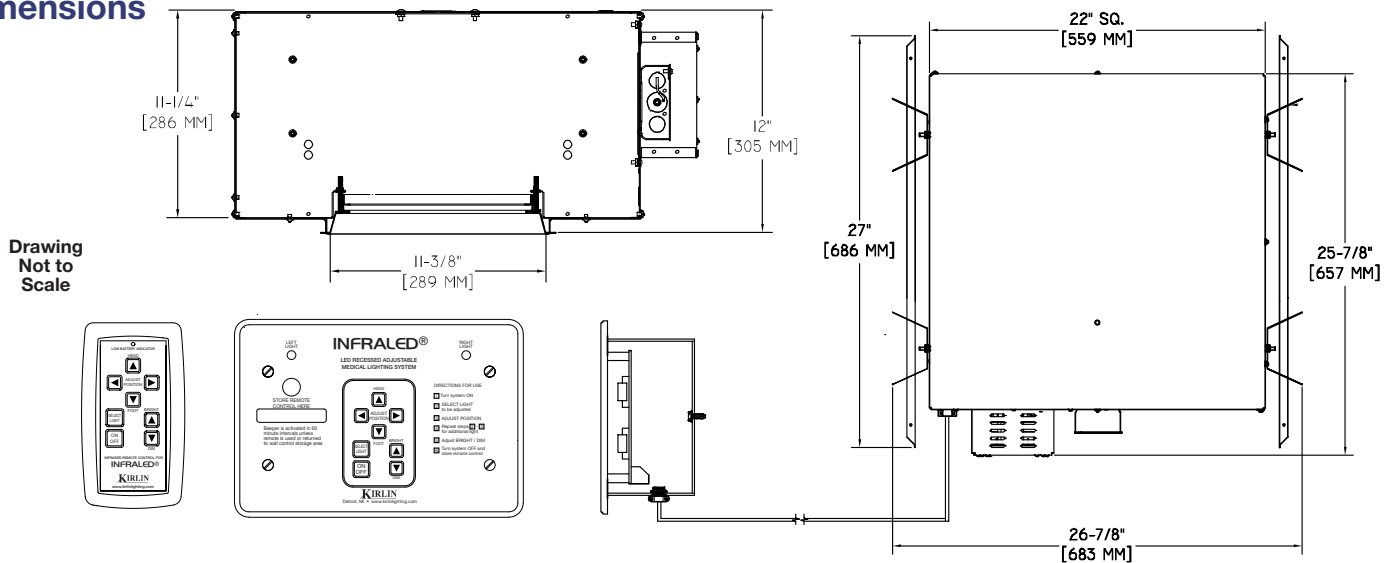

- Magnetic docking station for remote control storage
- Non-conductive wall plate assembly

Remote Control Also Features:

- Infrared control signals are invisible and will not interfere with other medical equipment.
- Durable; withstands common mishaps (dropped on the floor)
- Exclusive loss deterring beeper

UL, C-UL (Canada) Listed • Type IC Rated • Exclusive Three Year Warranty • Designed and Produced in U.S.A.

Dimensions

Options The following Options are available for MRR-12622. Add Option as suffix to catalog number. Example: MRR-12622-IP-SE.

Input Power

- 120 120V (50-60Hz) input and thermal protector.
- 58 277/120 volt stepdown transformer for 277 volt line input, prewired into fixture; with 277 volt thermal protector.
- 97 For other input supply voltages, consult factory.
- 98 347/120 volt stepdown transformer for 347 volt line input, prewired into fixture; with 120 volt thermal protector. Adds 10 watts to each fixture load.

Color Temperature (CCT)

- 50K 5000°K instead of 3500°K. 95+ CRI.
- 41K 4100°K instead of 3500°K. 95+ CRI.

Trim

- 32 White oversize trim ring. Specify O.D.
- 94 Custom color self-flanged flare trim instead. Consult factory.
- IP IP65 rated trim and lens.

Other

- 81 15° bottom pan achieves 50° high angle illumination in one direction. Maximum recessed depth 15-1/8".

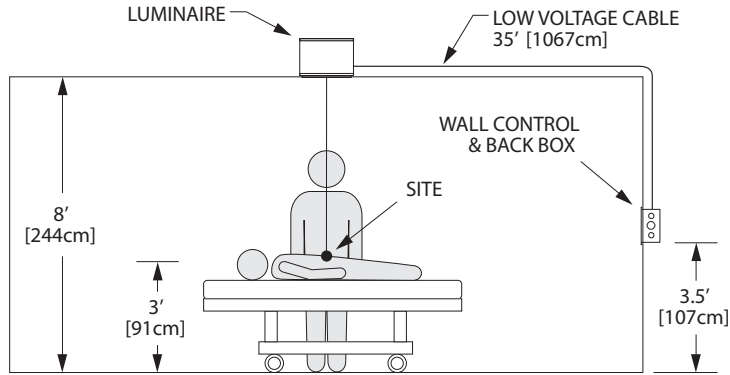

- 87 Custom length (> 35 feet) plenum rated wall control cables (4). Specify length.
- 99 Special modification. Consult factory.
- BI Beeper (remote control) inactivated by factory.
- RC Extra remote control.
- RS Remote infrared sensor with 35' cable.
- SE Fixture modified for seismic anchorage (by others). Meets California OSHPD and International Building Codes.

347V (Option -98): 80W

Cone of Light Key
Ft. Distance from fixture
FC Footcandles at nadir (0°)
Dia. Circle of light at 50% of FC

LM-80 Qualified • LM-79 Certified Photometry

* LED manufacturers maintain a tolerance of ±7% on flux (lumens) and power (electrical) measurements. Kirlin photometrics are actual test data from Independent Testing Laboratories (ITL) where photometry was measured from 3742 lumen (64W) light engines (within the established tolerance).

* Dia. (in ft.) shown is where FC value is half the FC at nadir.

MRR-12622

INFRALED® 1 LIGHT SYSTEM - 360°

LED INFRARED REMOTE CONTROLLED ADJUSTABLE LIGHTING SYSTEM

The lighting system includes both an infrared remote control and a flush wall control panel. Both provide full control of the lighting system including on/off, direction and intensity. A designated docking station on the wall control panel has been provided for storage of the remote control when not in use.

Remote and Wall Control Features:

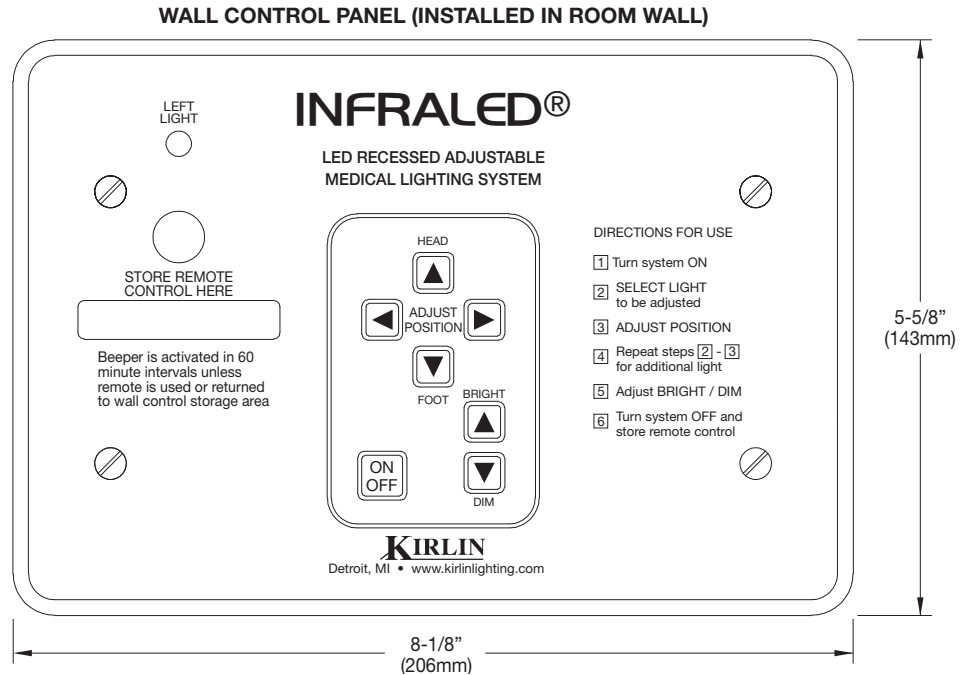

- Redundant full function controls for:
 - Power
 - Intensity (dimmer or brighter)
 - Direction (rotates 360° with tilt up to 35° from either side of nadir.
- Convenient one hand operation.
- Tactile-membranes and smooth surfaces for easy cleaning.

Wall Control (only) Features:

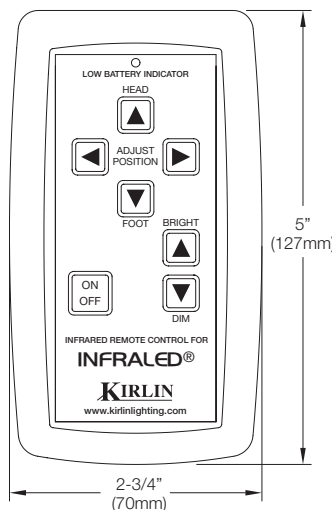

- Includes infrared receiver.
- Magnetic docking station for remote control.
- Less than 1 microamp current leakage from front of wall control panel.
- Back box provided by Kirlin.

Remote Control (only) Features:

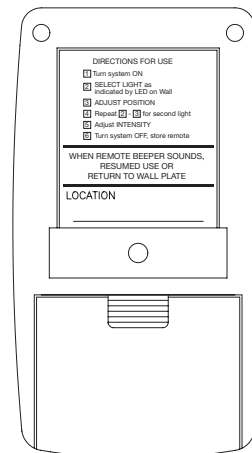

- Invisible infrared signal will not interfere with other equipment in the room.
- Impact resistant construction to withstand common mishaps (dropped on floor).
- Loss deterring beeper to remind user to return remote to docking station on wall control panel. Beeper is activated if remote control is not used for, nor returned to wall control panel within 1 hour.
- 9 volt standard battery provided.
- Low stand-by current assures long battery life.
- Back side has special "write-on" area for marking room location.
