

A photograph of an MRI suite interior. The room features a large MRI scanner with a patient table extended. The ceiling is equipped with recessed lighting fixtures, some of which are illuminated with a purple glow. A large window on the right side of the room provides a view of greenery outside. The walls are a light beige color, and the floor is a light-colored tile.

## Enlightening Care: Lighting Design in MRI Suites, Stand-Up MRIs, and Hybrid ORs

*1.0 AIA/CES LU (HSW) or NCQLP LEUP*

### Topics & Objectives:

- What is Magnetic Resonance Imaging (MRI) and how does it work?
- Special requirements of the MRI suite
- Three necessary components for successful MRI lighting
- Popular design techniques in the MRI suite
- Frequently forgotten questions
