

Kirlin Lighting: 25-Year Legacy Support Program

Kirlin fixtures are designed for a lifetime of performance, and we continue supporting them long after installation. Through our Legacy Support Program, Kirlin ensures ongoing access to spare parts, equivalent components, and technical documentation for a minimum of 25 years following a fixture's production for products sold January 1, 2020, or later.

Our program covers replacement items such as LED light sources, drivers, optics, frames, trims, and lenses, whether original or updated equivalents. As technologies evolve, we provide compatible solutions that maintain fixture function, performance, and safety standards.

The Legacy Support Program reflects Kirlin's commitment to sustainability, serviceability, and American manufacturing. By supporting products long-term, we help facilities extend the life of their lighting systems and minimize environmental impact.

After the expiration of a customer's standard or extended Kirlin Limited Warranty term, parts and components are available for purchase at current market pricing. Equivalent components may vary due to technology or regulatory changes. This program is not a product warranty and does not include labor or performance guarantees.
